

Title: **Front End Developer**
Location: Any Location/Hybrid/Remote

JOB SUMMARY

As a Front-End Developer, you will be responsible for developing user-friendly and visually appealing web applications using HTML, CSS, Javascript and frameworks like React and Next.js. You will interact with databases using SQL and deploy applications on Azure cloud services. In this role, you will collaborate with other developers, product managers, and QA specialists to add and improve features and functionality, gather feedback from users, and create high-quality cross-platform web applications. A strong understanding of front-end technologies, user interface and experience design principles, and willingness to learn and adapt is essential for success in this position.

JOB DUTIES

- Develop and maintain user-friendly web applications using HTML, CSS and frameworks like React and Next.js
- Optimize applications for speed and scalability
- Write SQL queries to fetch data from relational databases
- Deploy and manage applications on Azure cloud services
- Ensure cross-browser/device compatibility and responsiveness of web applications
- Create well-designed layouts and components to ensure intuitive and visually appealing user interfaces
- Stay up to date with emerging front-end technologies and best practices
- Collaborate with other developers, product managers and QA specialists to add and improve features and functionality
- Get feedback from, and build solutions for, users and customers
- Create quality mockups and prototypes of layouts

REQUIRED EXPERIENCE / QUALIFICATIONS

- 2+ years front end development experience
- Proficiency in website programming languages such as HTML, CSS, and JavaScript
- Understanding of key website design principles and SEO optimization
- Ability to use client input to create functional, creative, and user-friendly webpages
- Ability to test and debug websites
- Analytical and detail-oriented
- Excellent verbal and written communication skills
- Proficiency in frameworks like React and Next.js
- Experience with PostgreSQL or other relational databases
- Ability to work in a fast-paced, team-oriented environment
- Strong problem-solving skills and attention to detail
- In-depth understanding of the entire web development process (design, development and deployment)
- Ability to manage multiple tasks and meet tight deadlines

PREFERRED EXPERIENCE / QUALIFICATIONS

- TypeScript proficiency
- Familiarity with Azure cloud services
- Experience with Tailwind CSS is a plus
- Experience with version control using Git
- Figma or other design software for mocking up layouts

TECHNICAL SKILLS

- Javascript, Typescript (preferred)
- HTML, CSS
- React and Next.js or similar frameworks
- PostgreSQL or similar relational database
- Azure cloud services
- Strong debugging and optimization skills
- Version control with Git and Github
- VSCode editor
