

# CREATIVE PLANNING

Title: Software Engineer

Department: Application Development

Location: Overland Park, KS

Job Description: As a Software Engineer, you will be a key member of our team and have an essential role in shaping the firm's application ecosystem. With a focus on building scalable, robust, and efficient applications, your work will be instrumental in helping drive operational excellence.

***We do not accept resume submissions from third-party recruiters or staffing agencies. Please contact our recruiting team directly.***

## **Responsibilities**

- Use Agile practices to refine requirements through an iterative process of planning, defining acceptance criteria, prioritizing, developing, and delivering enterprise solutions.
- Provide operational support for applications, proactively updating relevant stakeholders on status changes and issues encountered.
- Author and maintain clear, concise, and up-to-date documentation for processes, procedures, and technical designs.
- Continuously improve applications, identify opportunities for optimization, and ensure that solutions scale efficiently as business needs change.

## **Qualifications**

- Bachelor's degree in computer science or computer engineering.
- Experience with cloud platforms such as Azure.
- Solid foundation in software development and database design (SQL, NoSQL).
- Strong attention to detail.
- Ability to work with broad and evolving requirements.
- Ability to work in a fast-paced environment.
- Ability to work independently and collaboratively in a team environment.
- Commitment to teamwork and excellence.

- Motivated and results oriented.
- Available to work outside of normal business hours when required.
